

Guidelines for Oral Presentations

Duration : The time available for each paper is **15 MINUTES PRESENTATION (including questions and answers)**. To be able to keep to the very tight schedule, it is absolutely necessary that all authors meet this time limit. Session moderators are instructed to be very strict about time-keeping of the 15 minute presentation slots.

- MS powerpoint will be available for presentations.
- There will be a folder with your session number in the laptop that we provide. You should install your presentation and all necessary files within that folder with the help of our technical assistant.
- Presentation from your own laptop is not recommended to be able to adhere to the announced timing.

Guidelines for Poster Presentation

- Posters should be set up before the poster session starts. However, poster presenters can set their posters earlier if they desire.
- The size of the board available to each poster will be:

Width: 85 cm x Height: 115 cm per paper.

- You are free to arrange the content and presentation style of your poster as long as it fits this size.
- Poster presenters may provide some handouts like a print version of their poster presenter.
